

Protocol

_NBit_co

numpy.typing._callable._SignedIntOp

```
graph BT; A[numpy.typing._callable._SignedIntOp] --> B[Protocol]; A --> C[_NBit_co];
```

The diagram illustrates inheritance or implementation relationships. At the top, two boxes labeled 'Protocol' and '_NBit_co' are positioned side-by-side. Below them, centered, is a third box labeled 'numpy.typing._callable._SignedIntOp'. Two arrows originate from the bottom of the 'numpy.typing._callable._SignedIntOp' box and point upwards to the bottom of the 'Protocol' and '_NBit_co' boxes respectively, indicating that the bottom box inherits from or implements both top boxes.
