

Exception

```
graph BT; ClosedPoolError --> PoolError; PoolError --> HTTPError; HTTPError --> Exception
```

The diagram illustrates a vertical hierarchy of exceptions. At the base is 'pip.\_vendor.urllib3.exceptions.ClosedPoolError', which inherits from 'pip.\_vendor.urllib3.exceptions.PoolError'. 'PoolError' inherits from 'pip.\_vendor.urllib3.exceptions.HTTPError', which in turn inherits from the base 'Exception' class at the top. Each level is represented by a rectangular box, and the inheritance is indicated by upward-pointing arrows between the boxes.

`pip._vendor.urllib3.exceptions.HTTPError`

`pip._vendor.urllib3.exceptions.PoolError`

`pip._vendor.urllib3.exceptions.ClosedPoolError`
