

Protocol

`_GenericType_co`

`numpy.typing._callable._BoolBitOp`

```
graph BT; A[numpy.typing._callable._BoolBitOp] --> B[Protocol]; A --> C[_GenericType_co];
```

The diagram illustrates a class hierarchy. At the bottom is a box labeled `numpy.typing._callable._BoolBitOp`. Two arrows originate from the top of this box: one points to a box labeled `Protocol` on the left, and the other points to a box labeled `_GenericType_co` on the right. This indicates that `numpy.typing._callable._BoolBitOp` inherits from both `Protocol` and `_GenericType_co`.
