

ndarray

```
graph BT; A[numpy.core.memmap.memmap] --> B[ndarray];
```

A diagram illustrating the relationship between two NumPy classes. At the bottom, a rectangular box contains the text `numpy.core.memmap.memmap`. A vertical arrow points upwards from the center of this box to the center of a second rectangular box above it, which contains the text `ndarray`. This indicates that `numpy.core.memmap.memmap` inherits from or is a subclass of `ndarray`.

`numpy.core.memmap.memmap`
